

**FILTEC**  
automation

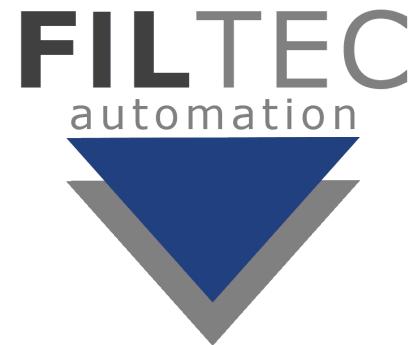

Manufacturing Filling equipment since 1998

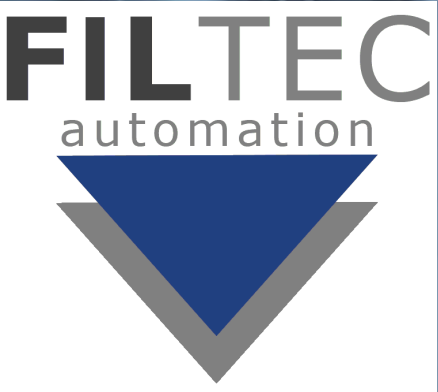

- Factories located in Durban, South Africa.
- Factory Staff compliment of 85.
- Established in 1998.
- A world leader in Net Weight filling.
- Distributors and Installations across the globe.

## OUR VISION:

The packaging solutions market is in a constant state of evolution, shaped by new consumption trends, emerging regulations & a shifting geopolitical context, we capitalize on our drive for innovation thereby keeping focus on the factory of tomorrow.

# Product Portfolio

- Rotary Bottle Unscramblers
- Rotary Net weight Filler
- Flow meter Filler

Products filled on these machines are:

Home & personal care products

Pharmaceutical OTC Syrups & Suspensions

Foods, Dairy, Oil, Industrial Chemicals

- Rotary Gravity Level Filler

Products filled on these machines are:

Milk and Juice

- Monoblock Rinser Filler  
Cappers
- Rotary Cappers
- Self Adhesive labellers
- Case Packers
- Turn Key Filling lines

# Rotary Bottle Unscramblers

- Ultra simple and reliable Funnel technology.
- Very low cost of ownership with minimal wear parts.
- Quick Change overs.
- HMI with Formats for quick setup and change overs.
- Full stainless steel Construction.
- Vacuum outfeed belt for bottle stability.
- Speeds upto 18,000 bph.
- Bottle Elevator feed systems.

TEC

# Rotary Net Weight Filler Cappers

- A world leader with state of the art digital net weight filling technology and a proven track record with many global multinational companies.
- Pressure filling for viscous products, Gravity filling for low viscosity products or our Hybrid of both technologies ensuring ultimate flexibility in one machine.
- Pressure filling equipped with Servo Driven Pump to control flow rate at the nozzle with precision for absolute accuracy and repeatability.
- French digital load cells with In flight mass autocorrection software for extreme accuracy.

# Rotary Net Weight Filler Cappers

- Ultra Clean non contact filling Technology especially ideal for Microbiologically sensitive products.
- Revolutionary Laminar flow Nozzle design
- Rapid and highly effective CIP due to very small on board tank.
- Ease of product or packaging change overs.
- State of the art pick n place Capping technology with US manufactured Hysteresis magnetic clutch with quick torque adjustment system.
- Rotary Cap Unscramblers and Waterfall cap Unscrambler elevators seamlessly orientating caps and feeding capper.
- Optional Servo capping systems.

# Rotary Net Weight Filler Cappers

- Domed deck with full drip tray around machine for dry floor operation.
- World class components from Festo, Siemens, Sick etc
- Full machine control via HMI with bottle and product specific Recipe's for quick change overs.

# Rotary Gravity Level Filler Cappers

- Ultra simple and reliable gravity level filling technology for Dairy and Juices.
- Options include Rinser Filler Cappers and Foil Cappers.
- Rapid and highly effective CIP.
- Ease of product or packaging change overs.
- State of the art pick n place Capping technology with US manufactured Hysteresis magnetic clutch.
- Domed deck with full drip tray around machine for dry floor operation.

# Linear Self adhesive labellers

- Models include Wing Eco and Wing Supreme.
- Italian built Label applicators.
- Label applications include Wrap around, front and back or both.
- Options include Non stop versions as well as 5 Axis stands.
- Ease of product or packaging change overs.
- HMI for quick Format selection.
- Full stainless steel construction.
- Available with variable data print on web, OCR/OCV, Pharma code and Label present detection.

# Turn Key Filling lines

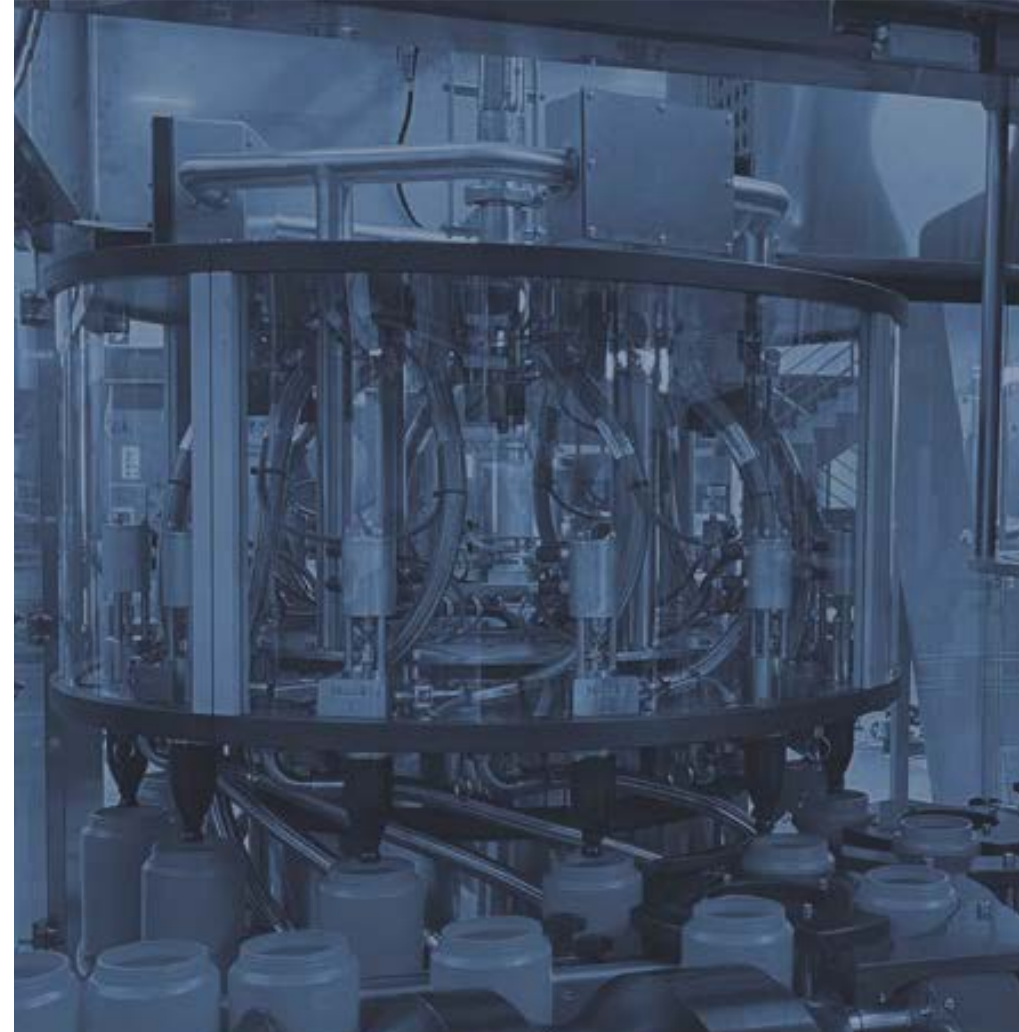

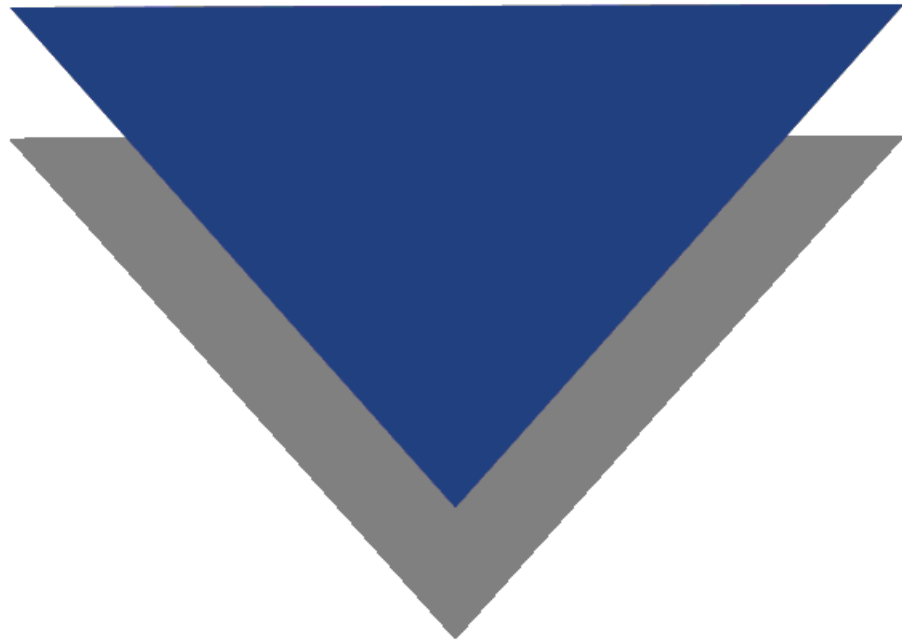

- Complete line integration with our OEM partners.
- Project management from conceptualization, design, manufacture to implementation and hand over.
- Equipment incl Hot Melt and Cold Glue labelers, Sleeve applicators, Check weigher's, Metal detectors, Case packers and Shrinkwrappers.
