ROBUST • EFFICIENT • SAFE

Filtec Automation offer a Semi Automatic level filler to fill free flowing low viscosity products; such as milk, water, beverages, cordials, vinegars etc. Included is a tank that will hold approximately 60 litres. The level filler is also offered with an option of a level control which will be fitted to the inside of the tank.

The level filler is completely adjustable and 200ml up to 5L bottles can be filled on the machine. Spacer change parts are supplied with the machine to adjust the fill volumes. The level filler is also very easy to clean for change overs of different products.

Advantages:

- Speed
- Mechanical Simplicity
- Accuracy
- Flexibility
- Quick Change Overs
- Compact
